ABOUT ME

From my first contact with computers as a child, I was totally captivated by their potential. This fascination led me to enter a professional technical course in Computer Science and Management. I took a degree in Computer Engineering at the Polytechnic Institute of Viseu (IPV). I am currently master's student in Artificial Intelligence at the Instituto Superior de Engenharia do Porto (ISEP). I believe in the value of knowledge and continuous development. In my previous roles, I felt willing to take on new challenges and was able to contribute to the company's success. With technical knowledge, a with a diverse set of skills and an interest in problem-solving, I am enthusiastic about playing a key role in innovative projects and contribute to the expansion of a world driven by technology.
